

CORONA PREVENTION DIRECTIVE -EXTERNAL VISITORS- as of August 20th 2021_Rev08

This guideline serves to control the spread of the Coronavirus (SARS-CoV-2) at the shipyard and thus the health protection of all guests, visitors and employees of the shipyard.

For this purpose, contact restrictions and a contact tracking option are elementary.

A. ACCESS TO THE SHIPYARD

I. No Entry

In general, the respective current version of the "Landesverordnung und Erlasse zum Umgang mit SARS-CoV-2"¹ shall apply.

For traveling into Germany and potential quarantines, the 'Coronavirus-Einreiseverordnung' of the Federal Republic of Germany in its current version is applicable.

Information on these regulations in several languages are available here:

www.bundesgesundheitsministerium.de/coronavirus-infos-reisende/einreise-sms-sprachen.html

Only after all obligations under these regulations are fulfilled (e.g. quarantine, registration etc.) entering the shipyard is permitted.

Persons with confirmed or suspected Covid-19-Infection may not enter the shipyard. Any quarantine or other measures imposed by authorities for them and for their contact persons have to be observed.

II. Registration Procedure

Before entering the shipyard, every visitor has to register at the main gate and fill in the "Corona questionnaire". If the certain questions from the questionnaire were answered with 'yes' the access to the premises of Nobiskrug GmbH will be denied.

The questionnaire is to be filled and handed in every day before entering the shipyard. Visitors with a shipyard pass can simplify the procedure and use the check-in card reader. The conditions for entering the shipyard remain the same.

¹ https://www.schleswig-holstein.de/DE/Schwerpunkte/Coronavirus/ documents/teaser_erlasse.html

III. Negative Covid-Test for entering the shipyard

When entering the shipyard, a negative Covid-19 test, no older than 72 hours, is to be proven. An attestation of a testing center or a plausibly documented self test can be shown (preferably a photo of the negative test marked with date and time).

Persons who are completely vaccinated (generally two vaccination doses + 14 days or one dose Janssen +14 days) or recovered from a corona infection (positive test at least 28 days but no more than 6 month ago) do not need a test, if they can properly proof the status as being vaccinated or recovered with suitable documents.

B. BEHAVIOR ON THE SHIPYARD/ ON BOARD

I. Rules

In Germany, the SARS-Cov-2 occupational safety standard² last issued by the Federal Ministry of Labor and Social Affairs on February 22, 2021 is in force. The clear principles stated therein apply without restriction (regulation on mouth-nose covering and on symptoms of illness).

The operating instruction BA-M214 (currently of 01.2021) applies in its entirety. It regulates working on the premises of Nobiskrug GmbH with the risk of infection with the corona virus SARS-CoV-2.

When entering the shipyard and onboard vessels, a mouth-nose mask or a filtering facemask (FFP mask) must be worn at all times. The sending contractor must provide the masks. Without these masks, the access to the shipyard and the vessels will not be permitted. There will be controls when entering the shipyard and in the access area of the vessels.

On the shipyard the minimum distance of 1.5m from other people must always be kept. If the minimum distance cannot be kept safely, then a mouth-nose mask or FFP mask must always be worn. A general mask obligation applies in the area of the docks and onboard the vessels. Crowds of people (more than 2 persons), especially parallel work by different trades in confined spaces on board, should be avoided. The coordination of activities / trades is characterized by appropriate control and reduction of personal contacts (number and duration). The project manager / host is responsible for the possible definition of space and vessel-related access restrictions.

Information signs, e.g. One-way street signs, distance markings, max. persons allowed etc. must always be followed.

Work tools, dishes, etc. should not be used by several people if possible (risk of a smear infection). If this cannot be avoided, the materials must be properly cleaned.

² <https://www.bmas.de/SharedDocs/Downloads/DE/PDF-Schwerpunkte/sars-cov-2-arbeitsschutzstandard.html>

The project managers / host reserve the right to take additional protective measures to reduce the risk of infection at the shipyard / onboard. The on-site notices must be obeyed.

II. Control

The plant security is instructed to check compliance with the above-mentioned guideline when entering the shipyard and, if necessary, to give references in the event of violations. The security team coordinates the controls at the shipyard.

Project manager, construction managers and the security team will conduct inspection tours on board the ships and demand compliance with this guideline.

C. OBLIGATION TO COOPERATE

Compliance with the preventive measures pursued by this guideline is in everybody's health interests. Please cooperate accordingly!

Contractors must instruct their employees accordingly about this guideline and ensure that they comply before accessing the shipyard and during the visit

Confirmed cases, but also suspected cases of COVID-19 infection of an employee, must be reported immediately to the contact point named in Chapter D.

D. CONTACT

The contact person for all issues relating to coronavirus prevention at the shipyard is the crisis management team set up for this purpose. It can be reached at: corona-team@nobiskrug.com
